PRESS RELEASE

February 2019

Joint ISO/CIE Standard

**ISO/CIE 8995-3:2018
Lighting of Work Places –
Part 3: Lighting Requirements for Safety and
Security of Outdoor Work Places**

This joint ISO/CIE International Standard is replacing the joint ISO/CIE International Standard ISO 8995-3:2006/CIE S 016:2005 without modification of its technical content.

To enable people to perform visual tasks efficiently and accurately, especially during the night, adequate and appropriate lighting has to be provided. The degree of visibility and comfort required in a wide range of outdoor work places is governed by the type and duration of activity.

The standard specifies the lighting requirements that will contribute to the visual needs for safety and security within outdoor work places.

This joint ISO/CIE International Standard has been approved by the CIE National Committees and by ISO. It is readily available from the [CIE Webshop](#) or from the National Committees of the CIE.

The price of this publication is EUR 57,- (Members of the National Committees of the CIE receive a 66,7 % discount on this price).
